The People's Voice

To the Editor:

[illegible] Department of State? This department should be investigated and the findings made public. Many of us have read time and again of how Fidel Castro was brought to power, aided by some person or persons on the fourth floor of the Department of state. Apparently there are many citizens in our country who feel that an investigation of this department is in order, as there are petitions being circulated in 48 states at this time to bring about such an investigation.

There seems to be a growing lack of confidence, among the citizens of the United States, of the President and our appointed leaders. Far too many of our so-called leaders seem to embrace a "no-win" policy. Sometimes it actually appears as though some of our 'leaders' are trying to alibi for communist dictators such as Khrushchev, Castro and others.

About four months ago when Khrushchev offered to remove the missiles from Cuba, the president remarked that this murderous dictator was 'statesmanlike' in making the offer.

There are many questions to which the American people should demand answers. Just where was the C. I. A. for the past two years while the arms buildup in Cuba was taking place? How many people had the opportunity to read the Holmes Alexander column which reported that pictures had been taken of United States destroyers escorting big Soviet vessels into Cuba? Why was this being done?

Many of the Cubans who have come to this country in recent weeks are positive that medium range missiles are still in Cuba. A recent report from underground sources in Cuba, states that Castro, at a party in Havana, Jan. 30, boasted of having 42 medium range missiles hidden there. This same underground source reported he had learned that 12 more such missiles are aboard Soviet vessels en route to Cuba. This report [illegible] on the Corpus Christi Caller, Feb. 6th.

Jim Atkins,
Pharr
